

- Q: What is a fever?

A: Fever is a temporary increase in body temperature, often due to an illness.

- Q: How much water should I drink daily?

A: An average adult should drink about 2-3 liters of water daily.

- Q: Can I take paracetamol on an empty stomach?

A: Yes, paracetamol can be taken with or without food.

- Q: What should I do if I feel dizzy?

A: Sit or lie down immediately and drink some water. If it continues, consult a doctor.

- Q: What is health insurance?

A: Health insurance helps cover the cost of medical expenses.

- Q: What are the symptoms of diabetes?

A: Common symptoms include frequent urination, increased thirst, and unexplained weight loss.

- Q: Can I visit another doctor if I doubt my diagnosis?

A: Yes, you can seek a second opinion from another qualified medical professional.

- Q: Is it legal for a hospital to refuse treatment?

A: In most countries, hospitals cannot refuse emergency treatment. However, non-emergency cases may vary.

- Q: What should I check in a prescription?

A: Check the drug name, dosage, frequency, and instructions. Make sure it's prescribed by a licensed doctor.

- Q: How can I file a complaint against a doctor for negligence?

A: You can file a complaint with the state medical council or healthcare regulatory authority.

- Q: What is medical malpractice?

A: Medical malpractice occurs when a healthcare provider deviates from accepted standards of practice, causing harm to a patient.

- Q: What legal steps can I take if I am a victim of healthcare fraud?

A: You can report the incident to your country's medical board, consumer court, or healthcare fraud department.

- Q: Can I sue a hospital for a wrong diagnosis?

A: Yes, if the misdiagnosis caused harm due to negligence, you may file a medical negligence lawsuit.

- Q: What laws protect patients in India?

A: The Clinical Establishments Act, Consumer Protection Act, and the Medical Council of India guidelines are among key legal protections.

- Q: How do I obtain my medical records from a hospital?

A: You can request your records in writing; hospitals are legally bound to provide them within a specific time frame.

- Q: What is stress?

A: Stress is the body's reaction to any change that requires an adjustment or response.

- Q: How can I overcome stress?

A: You can manage stress through regular exercise, meditation, proper sleep, and talking to friends or a therapist.

- Q: What are the effects of long-term stress?

A: Long-term stress can lead to health problems like anxiety, depression, heart disease, and a weakened immune system.

- Q: Is there a legal remedy if a mental health issue is ignored by a hospital?

A: Yes, you can file a complaint under the Mental Healthcare Act, 2017 in India if a hospital fails to provide proper mental healthcare.

- Q: What legal rights do I have as a mental health patient?

A: Under the Mental Healthcare Act, 2017, you have the right to access mental healthcare, make advance directives, and receive care without discrimination.

- Q: Can I take legal action for stress caused by medical negligence?

A: Yes, if stress or mental trauma is a result of negligence by a healthcare provider, you can pursue legal action under medical malpractice laws.
